Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has converted the conditional registrations of Technical Cyazofamid Fungicide and the end-use product Ranman 400SC Agricultural Fungicide to full registrations, *Pest Control Products Act* Registration Numbers 27983 and 27984, respectively.

Corresponding maximum residue limits (MRLs) were proposed in the consultation document published on 22 June 2010, Proposed Maximum Residue Limit PMRL2010-28, *Cyazofamid*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect as of the publication date of this document and are in addition to the MRLs already established for cyazofamid.

Established Maximum Residue Limits for Cyazofamid

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Cyazofamid	4-chloro-2-cyano-*N*,*N*-dimethyl-5-(4-methylphenyl)-1*H*-imidazole-1-sulfonamide, including the metabolite 4-chloro-5-(4-methylphenyl)-1*H*-imidazole-2-carbonitrile	0.02	Fat, meat and meat by-products of cattle, goats, horses and sheep; milk

A complete list of all pesticide MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
